WHAT IS NEM NOVA

This programme is for the commercial and industry users to install a solar photovoltaic (PV) system for self-consumption and allows excess electricity to be exported to the national grid at “System Marginal Price” (SMP).

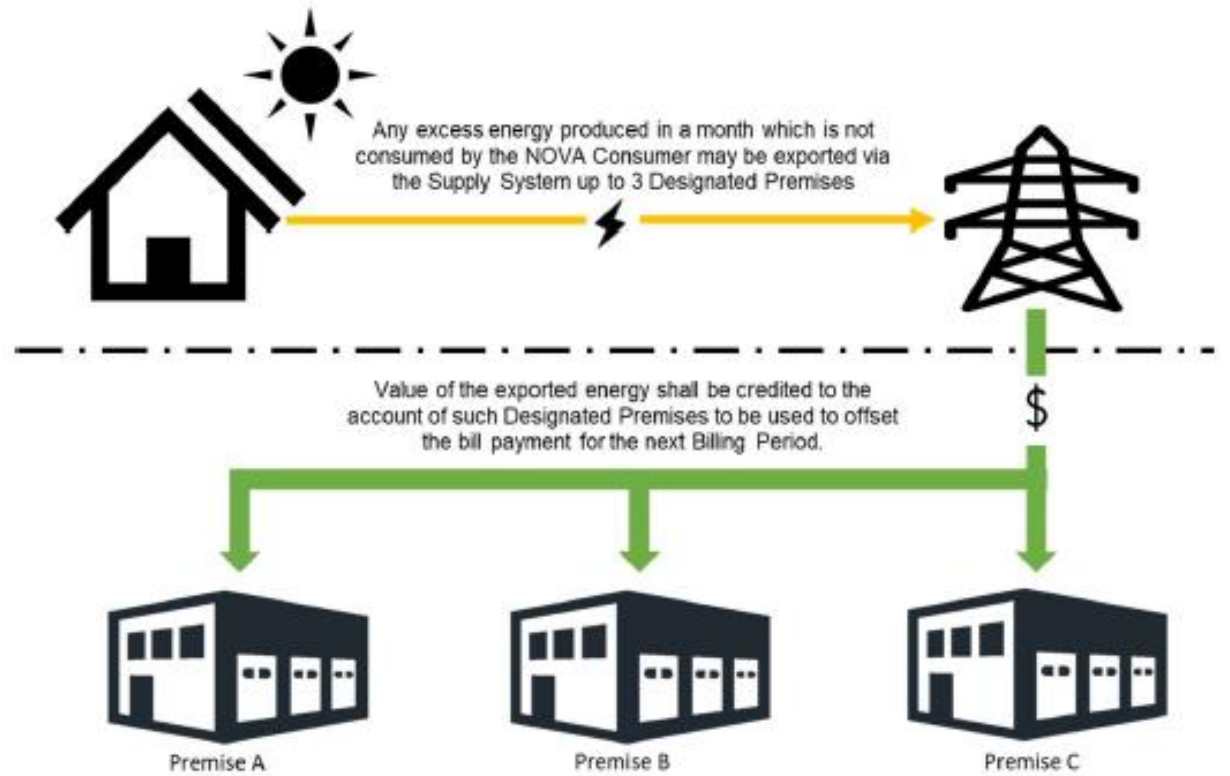

“The Single Buyer” (TNB) shall publish the Average SMP of the preceding month on its website no later than the 14th day of every month.

There are category A & category B.

NEM NOVA: CATEGORY A

NEM NOVA: CATEGORY B

CORPORATE PPA MODEL

TURN-KEY SYSTEMS INTEGRATOR & OPERATOR

- 1** Client signs Power Purchase Agreement (PPA) for clean, renewable energy for fixed number of years at discounted rate.
- 2** eLeaps will arrange zero risk solution which includes funding, design and technical resolutions. Installation, testing and commissioning.
- 3** Throughout the tenure of the PPA, eLeaps will own, operate and maintain the Solar PV system.
- 4** Client benefits from paying a discounted power tariff to eLeaps and eventually own the system.
